Re: Water Line Break
From: City of Wellington

The City has experienced a break in one of the two main supply lines of water to the city. The break occurred late yesterday and crews have worked to isolate the break. Water is being supplied to the city from the second main line. Some areas of the city may be experiencing diminished volumes of water due to rerouting of the primary supply. The City appreciates the public's patience as crews work to further investigate and resolve the issue as soon as possible.

Thank you.
